TRADESMAN®

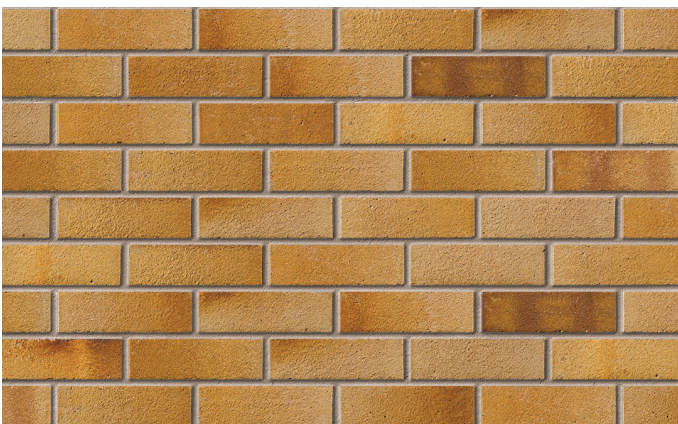

TRADITIONAL FINISHES FOR THE MODERN BUILDER

Much of the UK's historic housing stock has been built with bricks made from distinctive Lower Oxfordshire Clay, and our **Tradesman® Range** has been meticulously designed to blend in with these bricks, whenever they have been used.

Made to exacting standards, the whole Tradesman Range is rated F2 and therefore has a superior durability, along with a high compressive strength and low water absorption. This means they can be used with confidence in almost all settings and can handle the harshest weather conditions.

Matching with extensions and refurbishments, along with new builds and boundary walls is made simple due to excellent consistency of both colour and texture, along with ease of laying, and minimal waste.

TRADESMAN BUFF MULTI

PRODUCT CODE:	A0619A
FACTORY AND LOCATION:	Cattybrook, Bristol
DURABILITY:	BS EN771-1 F2
ACTIVE SOLUBLE SALTS:	BS EN771-1 S2
COMPRESSIVE STRENGTH ($\geq N/mm^2$):	BS EN771-1 60
WATER ABSORPTION ($\leq \%$):	BS EN771-1 9
SIZE TOLERANCES MEAN AND RANGE:	BS EN771-1 T2 RI
TYPE AND TEXTURE:	Wirecut Rolled
SPECIAL SHAPED BRICKS:	Cut and Bond
SIZE (mm):	215 x 102 x 65
PACK QUANTITY:	500

WHY USE THE TRADESMAN RANGE

Price

Competitively priced enabling our customers to compete without compromising quality

Durability

All products are rated F2, meaning that our product can be used in any application without fear of damage from extreme weather, therefore giving our customers complete confidence in the products performance

Range

Replicating traditional aesthetics, the Tradesman range provides high quality modern solutions for traditional builds

Mixed loads

Produced at multiple locations across the UK, the Tradesman range can be conveniently mixed to make up a full load, making stocking easier for merchants with less yard space

Consistency

Consistent colour, texture and quality, giving customers greater confidence in the long term, both for depot stock and sites

Low breakages

With very few breakages, this saves our customers money with wasted products

Special shapes

All products are supported by Ibstock Kevington's Cut & Bond services, meaning customers can offer solutions on projects where a non-standard brick type or size is required

Support

The range is supported by samples, literature and it's own website, meaning customers have the support they need to promote the products

Commission

Because the range can also go direct to site, customers can make specification commission when promoting the products

Perforations

Make the product easier to lay and cut when required

Promotions

Having been historically promoted, the Range is established and something end-users will enquire about with our customers, giving great chance of sales opportunities
